OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Fort Dix in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Fort Dix began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the New Jersey Historic Preservation Office and the New Jersey State Museum, both located in Trenton, New Jersey. The records search was performed in April 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. A draft Section 6 Summary letter is enclosed for the tribe (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT DIX

The first recorded archaeological work at Fort Dix was in 1982. In that year, and the following, Louis Berger and Associates, Inc. conducted a Phase I survey consisting of a 10% sample of the installation. They recorded six sites: three sites produced prehistoric artifacts; two sites produced historic artifacts; and one site produced both historic and prehistoric artifacts. The prehistoric sites were dated as being from the Late Archaic and Middle Woodland periods based upon the artifact assemblages.

Also in the 1980s, although the exact date is unknown, R. Alan Mounier conducted a survey for the Northern Burlington County Regional Sewage Authority which included a portion of Fort Dix. One site, consisting of a single lithic flake, was recorded on the post.

Hunter Research, Inc. conducted a third survey on the post in 1992. The survey, for a tertiary treatment sewage facility, located three new sites on the post. All three of the sites are recorded as historic deposits. Subsequently, Hunter Research, Inc. conducted an excavation at the Cherry Valley Tavern site (28Bu413) which they had recorded during the 1992 survey. The excavation produced 19th Century Euroamerican artifacts.

Artifacts collected during these investigations include prehistoric lithics, ceramics, and animal bone, as well as historic ceramics, coal, metal, bricks, and glass. No human remains were excavated.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 9.5 ft³ of artifacts and associated documentation has been made from Fort Dix and is currently located at two repositories:

Hunter Research, Inc., Trenton, New Jersey:	7.48 ft ³
New Jersey State Museum, Trenton, New Jersey:	2.0 ft ³

The attached *Summary of Current Locations of Archaeological Collections from Fort Dix* (Appendix III) provides information about each collection derived as a result of archaeological investigations at the installation and a point of contact for each repository. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

The two collections made by Hunter Research, Inc. remain in the possession of that company and consist of historic metal and glass and prehistoric lithics. Although the sites are designated as historic sites, the prehistoric components contain stone tools which date from the Late Archaic period.

The collection produced by Louis Berger and Associates, Inc. is curated at the New Jersey State Museum as collection number A134. It consists of prehistoric stone tools and debitage, calcined animal bone, prehistoric ceramic fragments, as well as historic ceramics, bricks, coal, nails, glass and plaster.

The collection made during the survey conducted for the Northern Burlington County Regional Sewerage Authority could not be located. The Authority has ceased to exist. Mounier, the author of the report, could not be located. Neither county officials nor the engineering firm that contracted with Mounier could provide any additional information regarding the collection.

No human skeletal remains or funerary objects were identified in a thorough review of the archaeological records, associated literature, and telephone interviews. The final examination of sacred objects or objects of cultural patrimony may be established by the associated Native American tribes (if determined to be culturally affiliated and the objects meet the definitions and restrictions specified in NAGPRA) upon further deliberation.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on Fort Dix are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research;

Appendix V is the list of references contained in the National Archeological Data Base (NADB); and Appendix VI provides the references cited in the literature but not available for review by the MCX.

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT DIX

According to the maps provided by Goddard (1978:Fig. 1, 2), Trigger (1978:ix) and Bragdon (1990:Map 4.1), at the time of Euroamerican contact the Delaware inhabited the area now occupied by Dix. The 1978 Indian Land Claims map (U.S.G.S. n.d.) does not indicate any adjudications for the state of New Jersey.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 Summary letter (Appendix I) and the address of the tribal representative from the federally recognized tribe which may be culturally affiliated with the collections (Appendix II).

The Delaware are the only federally recognized tribe with which the artifacts might be culturally affiliated.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR FORT DIX, NEW JERSEY

[Installation Header]

Mr. Lawrence F. Snake, President
Delaware Executive Committee
Delaware Tribe of Western Oklahoma
P.O. Box 825
Anadarko, OK 73005

Dear Mr. Snake:

I am writing to inform you of collections held by Fort Dix that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Delaware Tribe. Fort Dix has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Dix is responsible for collections that include approximately 9.5 cubic feet of artifacts and associated documents. These archaeological collections were generated from surveys and/or excavations conducted from 1985 to the present. The collections consist of prehistoric stone tools, ceramics, and animal bone, historic materials such as building materials, ceramics, and metal fragments, and associated documentation such as field notes, photographs, and correspondence. No human skeletal remains or associated funerary objects were identified in our review of the collections documentation.

We are notifying the Delaware Tribe because some of these materials were found in, or near the area thought to be part of the territory occupied or used aboriginally by the [Tribe]. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [installation POC] regarding any of these issues, at [POC phone, address].

To facilitate discussions between Fort Dix and the Delaware Tribe on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM FORT DIX, NEW JERSEY

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

Summary of Current Location of Archaeological Collections

As of July

Repository	Repository POC	Telephone	Collection ID	Site Numbers	Fieldwork Dates
Hunter Research Inc.	Harriet Kronick	(609) 695-0122	Cherry Valley Tavern	28BU413

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
